— GENERAL GUIDELINES —

Genetic risk or predisposition given in the report is based on statistically relevant genomics research studies, which should not be taken as a diagnosis of any health condition or overall wellness.

Traits in the report are not genetically interlinked; their genetic associations are independent of each other.

Therefore, every trait score and interpretation are independent of each other.

This report provides information about genetic predispositions only and may not indicate current conditions or characteristics.

The information in the report may provide an understanding of one's genetic risks and may help in making informed decisions regarding one's wellness and goals.

Please consult with your doctor, or other qualified health care professional before making any dietary, fitness, health and wellness related changes.
