# Hematology Gene Test Women

SAMPLE SUMMARY REPORT

### **Hematological Diseases**

Red blood cell disorder

Traits		Risk	Rating	Description
	Aplastic Anemia	Slightly Elevated Risk	6.1	As per your genetics, you have a slightly elevated risk of developing aplastic anemia.
	Iron Deficiency Anemia	Slightly Elevated Risk	7.0	As per your genetics, you have a slightly elevated risk of developing iron-deficiency anemia.
٢	Sickle Cell Anemia	Typical Risk	6.0	As per your genetics, you have a typical risk of developing sickle cell anemia.
S	High-altitude polycythemi a	Typical Risk	5.3	As per your genetics, you have a typical risk of developing high-altitude polycythemia.

#### Platelet disorder

Traits		Risk	Rating	Description
	Von Willebrand Disease	Highly Elevated Risk	9.0	As per your genetics, you have a highly elevated risk of developing Von Willebrand disease.
	Immune thrombocytopenia	Slightly Elevated Risk	6.1	As per your genetics, you have a slightly elevated risk of developing immune thrombocytopenia.
P	Essential Thrombocytosis	Typical Risk	5.8	As per your genetics, you have a typical risk of developing essential thrombocytosis.

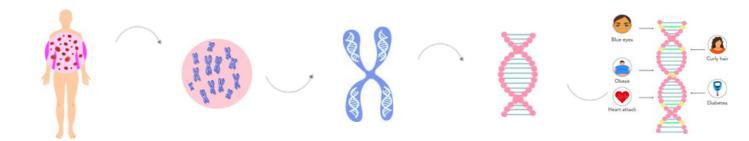

#### Clotting disorder

Trait	S		Risk	Rating	Description
		Thrombophilia	Typical Risk	5.0	As per your genetics, you have a typical risk of developing thrombophilia.

## How to Read Your Report — what is genetics? —

Human are made up ofCells are made up ofNucleus is made up ofChromosomes are madeDNA is made up ofcellsnucleuschromosomesup of DNAgenes

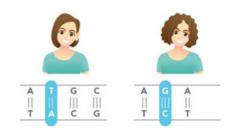

Changes in nucleotides lead to genetic variations

Genes are coded by nucleotides

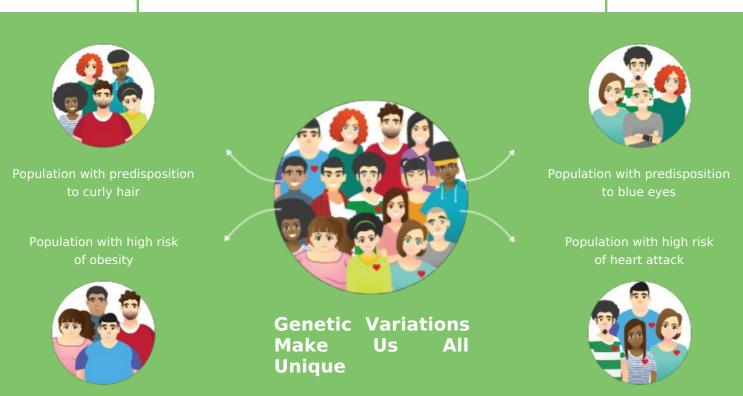

Straight hair Curly hair

#### WHAT IS PREDICTIVE GENETICS?

#### Your Name/Barcode

#### - SCORE INTERPRETATIONS

SCORE	DEPICTION	INTERPRETATION
0-2	Excellent / Protective	An 'excellent / protective' score indicates a very favorable response or ability for a trait
2.1-4	Good / Lower Risk	A 'good / lower risk' score indicates a favorable response or ability for a trait
4.1-6	Typical	A 'typical' score indicates a typical response or ability for a trait
6.1-8	Poor / Slightly Elevated	A 'poor / slightly elevated' score indicates an unfavorable response or ability for a trait
8.1-10	Very Poor/ Highly Elevated	A 'very poor / highly elevated' score indicates a very unfavorable response or ability for a trait

#### – GENERAL GUIDELINES –

Genetic risk or predisposition given in the report is based on statistically relevant genomics research studies, which should not be taken as a diagnosis of any health condition or overall wellness. Traits in the report are not genetically interlinked; their genetic associations are independent of each other. Therefore, every trait score and interpretation are independent of each other.

This report provides information about genetic predispositions only and may not indicate current conditions or characteristics. The information in the report may provide an understanding of one's genetic risks and may help in making informed decisions regarding one's wellness and goals. Please consult with your doctor, or other qualified health care professional before making any dietary, fitness, health and wellness related changes.
