# Infectious Gene Test Women

SAMPLE SUMMARY REPORT

### **Infectious Diseases**

### **Bacterial Infections**

| Traits |                                  | Risk                      | Rating | Description   |
|--------|----------------------------------|---------------------------|--------|---|
| Ø      | Tuberculosis                     | Slightly Elevated<br>Risk | 6.9    | As per your genotype, you have a slightly elevated risk of developing Tuberculosis.             |
|        | Brucellosis                      | Typical Risk              | 5.3    | As per your genotype, you have a typical risk of developing brucellosis.                        |
|        | Chronic Q Fever                  | Typical Risk              | 5.3    | As per your genotype, you have a<br>typical risk of developing Chronic Q<br>fever.              |
| Ś      | Helicobacter Pylori<br>Infection | Typical Risk              | 5.0    | As per your genotype, you have a<br>typical risk of developing Helicobacter<br>Pylori Infection |
| ٩      | Syphilis                         | Typical Risk              | 5.0    | As per your genotype, you have a typical risk of developing Syphilis.                           |

### Parasitic Infections

| Traits |  | Risk                      | Rating | Description  |
|--------|--|---------------------------|--------|--|
|        | Leishmaniasis  | Slightly Elevated<br>Risk | 7.2    | As per your genotype, you have a slightly elevated risk of developing Leishmaniasis. |
| ٩      | Toxoplasmosis  | Slightly Elevated<br>Risk | 7.0    | As per your genotype, you have a slightly elevated risk of developing toxoplasmosis. |
|        | Chagas Disease   | Typical Risk              | 5.5    | As per your genotype, you have a<br>typical risk of developing Chagas<br>disease.    |
|        | Malaria  | Typical Risk              | 5.7    | As per your genotype, you have a typical risk of developing Malaria.                 |
|        | Human African<br>Trypanosomiasis<br>(Sleeping<br>Sickness) | Typical Risk              | 4.5    | As per your genotype, you have a typical risk of developing sleeping sickness.       |

### Viral Infections

| Traits |                                | Risk                      | Rating | Description  |
|--------|--------------------------------|---------------------------|--------|--|
| -      | Dengue                         | Typical Risk              | 5.9    | As per your genotype, you have a typical risk of developing Dengue.  |
|        | Encephalitis                   | Slightly Elevated<br>Risk | 6.5    | As per your genotype, you have a slightly elevated risk of developing Encephalitis.                              |
|        | Hand,Foot and<br>Mouth Disease | Slightly Elevated<br>Risk | 7.3    | As per your genotype, you have a<br>slightly elevated risk of developing<br>Hand, foot and mouth disease (HFMD). |
| 4      | Hepatitis                      | Typical Risk              | 5.6    | As per your genotype, you have a protective genotype against developing Hepatitis.                               |
|        | HIV Infection                  | Typical Risk              | 5.8    | As per your genotype, you have a typical risk of developing HIV infection.                                       |
|        | Influenza                      | Slightly Elevated<br>Risk | 6.5    | As per your genotype, you have a slightly elevated risk of developing Influenza.                                 |

### **Microbial Infections**

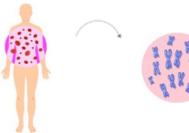

| Traits |  | Risk                      | Rating | Description   |
|--------|--|---------------------------|--------|---|
|        | Keratitis                              | Slightly Elevated<br>Risk | 7.6    | As per your genotype, you have a slightly elevated risk of developing keratitis.                        |
|        | Pneumonia                              | Slightly Elevated<br>Risk | 6.2    | As per your genotype, you have a slightly elevated risk of developing pneumonia.                        |
|        | Sepsis                                 | Slightly Elevated<br>Risk | 6.1    | As per your genotype, you have a slightly elevated risk of developing sepsis.                           |
| T      | Recurrent<br>Vulvovaginal<br>Infection | Slightly Elevated<br>Risk | 7.0    | As per your genotype, you have a slightly elevated risk of developing Recurrent VulvoVaginal Infection. |

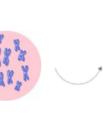

## How to Read Your Report — what is genetics? —

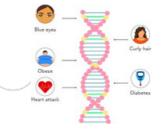

Human are made up of<br/>cellsCells are made up of<br/>nucleusNucleus is made up of<br/>chromosomesChromosomes are made<br/>up of DNA

DNA is made up of genes

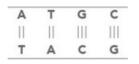

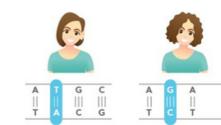

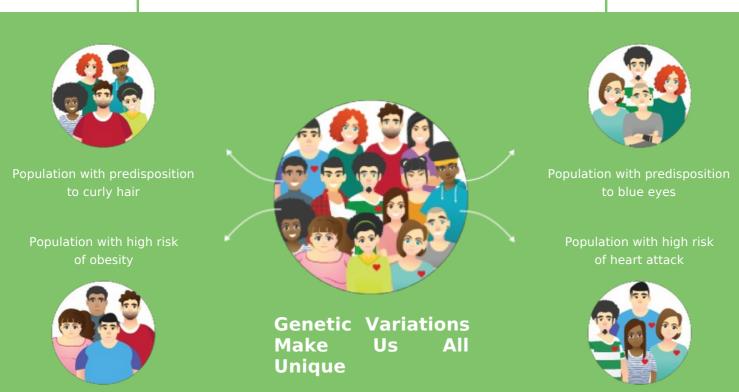

Changes in nucleotides lead to genetic variations Straight hair Curly hair

Genes are coded by nucleotides

### WHAT IS PREDICTIVE GENETICS?

#### Your Name/Barcode

### - SCORE INTERPRETATIONS

| SCORE  | DEPICTION                     | INTERPRETATION   |
|--------|-------------------------------|--|
| 0-2    | Excellent /<br>Protective     | An 'excellent / protective' score indicates a very favorable response or ability for a trait       |
| 2.1-4  | Good / Lower<br>Risk          | A 'good / lower risk' score indicates a favorable response or ability for a trait                  |
| 4.1-6  | Typical                       | A 'typical' score indicates a typical response or ability for a trait                              |
| 6.1-8  | Poor / Slightly<br>Elevated   | A 'poor / slightly elevated' score indicates an unfavorable response<br>or ability for a trait     |
| 8.1-10 | Very Poor/ Highly<br>Elevated | A 'very poor / highly elevated' score indicates a very unfavorable response or ability for a trait |

### – GENERAL GUIDELINES –

Genetic risk or predisposition given in the report is based on statistically relevant genomics research studies, which should not be taken as a diagnosis of any health condition or overall wellness. Traits in the report are not genetically interlinked; their genetic associations are independent of each other. Therefore, every trait score and interpretation are independent of each other.

This report provides information about genetic predispositions only and may not indicate current conditions or characteristics. The information in the report may provide an understanding of one's genetic risks and may help in making informed decisions regarding one's wellness and goals. Please consult with your doctor, or other qualified health care professional before making any dietary, fitness, health and wellness related changes.
