## — WHAT IS GENETICS? —

Human are made up of cells

Cells are made up of nucleus

Nucleus is made up of chromosomes

Chromosomes are made up of DNA

DNA is made up of genes

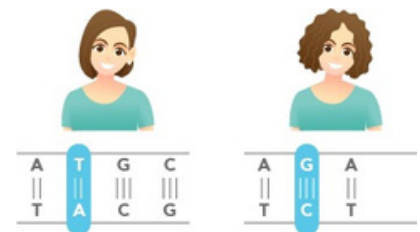

Genes are coded by nucleotides

## WHAT IS PREDICTIVE GENETICS?

## — SCORE INTERPRETATIONS —

SCORE	DEPICTION	INTERPRETATION
0-2	Excellent / Protective	An 'excellent / protective' score indicates a very favorable response or ability for a trait
2.1-4	Good / Lower Risk	A 'good / lower risk' score indicates a favorable response or ability for a trait
4.1-6	Typical	A 'typical' score indicates a typical response or ability for a trait
6.1-8	Poor / Slightly Elevated	A 'poor / slightly elevated' score indicates an unfavorable response or ability for a trait
8.1-10	Very Poor/ Highly Elevated	A 'very poor / highly elevated' score indicates a very unfavorable response or ability for a trait

## — GENERAL GUIDELINES —

Genetic risk or predisposition given in the report is based on statistically relevant genomics research studies, which should not be taken as a diagnosis of any health condition or overall wellness.

Traits in the report are not genetically interlinked; their genetic associations are independent of each other. Therefore, every trait score and interpretation are independent of each other.
