

# GASTROINTESTINAL

11 TRAITS

The gastrointestinal (GI) tract is crucial for acquiring nutrition; however, numerous issues related to gastrointestinal health can negatively affect quality of life. Identifying genetic risks for GI conditions can help individuals navigate these challenges with greater ease.

## GI Accessory Disorders

- Cirrhosis
- Gallstones
- Non-Alcoholic Fatty Liver Disease
- Pancreatitis
- Primary Biliary Cholangitis
- Primary Sclerosing Cholangitis

## Digestive Tract Disorders

- Barrett Oesophagus
- Celiac disease
- Crohn's Disease
- Irritable Bowel Syndrome (IBS)
- Ulcerative Colitis

# GastroIntestinal Disorders

## GI Accessory Disorders

Traits		Risk	Rating	Description
	Pancreatitis	Highly Elevated Risk	8.4	As per your genotype, you have highly elevated risk of developing pancreatitis.
	Primary Biliary Cholangitis	Typical Risk	5.6	As per your genotype, you have a typical risk of developing primary biliary cholangitis.
	Primary Sclerosing Cholangitis	Slightly Elevated Risk	6.1	As per your genotype, you have a slightly elevated risk of developing primary sclerosing cholangitis.
	Cirrhosis	Typical Risk	5.5	As per your genotype, you have a typical risk of developing cirrhosis.
	Gallstones	Slightly Elevated Risk	6.4	As per your genotype, you have a slightly elevated risk of developing gallstones
	Non-Alcoholic Fatty Liver Disease	Slightly Elevated Risk	6.7	As per your genotype, you have a slightly elevated risk of developing non-alcoholic fatty liver disease.

## Digestive tract disorders

Traits	Risk	Rating	Description
 Barrett Esophagus	Slightly Elevated Risk	6.5	As per your genotype, you have a slightly elevated risk of developing Barrett Esophagus
 Irritable Bowel Syndrome (IBS)	Typical Risk	5.3	As per your genotype, you have a typical risk of developing Irritable Bowel Syndrome (IBS)
 Ulcerative Colitis	Slightly Elevated Risk	6.1	As per your genotype, you have a slightly elevated risk of developing ulcerative colitis
 Celiac disease	Typical Risk	4.9	As per your genotype, you have a typical risk of developing Celiac disease.
 Crohn's Disease	Typical Risk	5.5	As per your genotype, you have a typical risk of developing Crohn's disease.
